## PHARMACY & PRESCRIPTIONS

# Electronic Prescribing (eRX) Consent

Our office uses electronic prescribing (eRX). Prescriptions are sent to your pharmacy over a secure connection — the same kind of technology used by credit card companies — which helps protect the privacy of your personal information.

eRX also lets your doctor see important information, such as drug interactions and your prescription history. For your family, that means:

- Less confusion over handwritten prescriptions or unclear phone calls
- Fewer medication errors
- Less chance of an adverse drug reaction
- Fewer trips to drop off prescriptions at the pharmacy
- A safer, faster, easier way to get your prescription filled

## PATIENT CONSENT

---

I agree that Dr. Vemuri may request and use my prescription medication history from other healthcare providers or third-party pharmacy benefit payers for treatment purposes.
